***Regulatory inspection
requirements for
water, refrigeration
or HVAC systems?***

We have your back!

How BIMcare works for me on refrigeration, HVAC and ventilation systems:

1. Leak Testing: Fully documented in accordance with EU 573/2024 - no worries, no paperwork.

2. Hygiene & Ventilation: Clean Filter, humidification and air handling systems - issues are prevented before they arise.

3. Potable Water: Inspection and secure documentation - no risk with legionella or tenants.

4. After-care & Repairs: If deficiencies occur, I immediately receive a repair quote – for fast resolution and security.

BIMcare simply takes my worries away.

„No concerns about regulations or fines - everything is documented online.“

„Regular maintenance saves time, stress and energy - my systems last longer.“

„Clean air, safe potable water and minimal leaks - everything reliably under control.“

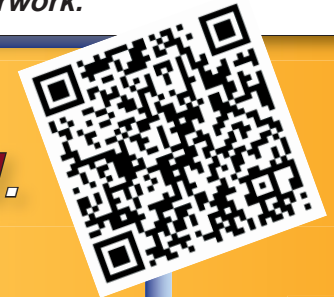

We make the climate

BIMcare handles everything! Scan. Book. Done.

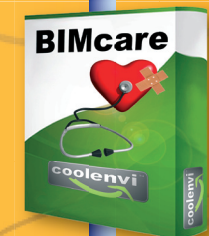

„Online logbook included - no paperwork.“
